

Berneer[®]

Video Anti-Interference Filter

Features

- Avoid image shaking, distorting and vagueness, which are caused by interference during video signal transmitting
- Effectively lengthen distance of video signal (SYV75-5 video line: 1km)
- Mainly used in the strong-current-interference areas such as elevator, motor, transformer, substation, launching tower and power plant

Specifications

Models	Specifications
BN-GR100	Supply voltage: DC+12V
BN-GR300	Supply voltage:DC15V~DC3 and AC12V~AC24V

Notice: standard configuration **not contain power source**
